

# Wedding Dances

**BALLROOM**  
*Baby*

*Dances that are beautiful and unique...  
- like your relationship.*

## What should our dance look like?

We think that your first dance as a married couple should reflect your relationship. Whether it's sweet and simple or fast paced and thrilling, your wedding guests should say, "that is so them!". It's best to start by picking a song which you both like. Then we can get to work on choreographing a dance with your influence as the lessons progress. Have you seen something you liked? We can probably do that too!

## When should we start?

In a perfect world, it is best to start as early as you can. We've had couples come in almost every week for year to put together the performance of a lifetime. However, we understand that time gets away from us so we can design your dance based on how many weeks you've got left. The wedding is Saturday? No worries, just a basic 2 step for you! You can also start some lessons now, practice at home, then pick it up again just before the big day.

## How do we get started?

Let us know which days and times suit you and we can match you with an instructor with the same availability. From there, tell us which song you've picked (or we can help you select one!) and our instructors will get to work designing your dance.
